CogniQuest

Mind map - 2

Metacognitive skill targeted: planning, reflection, self-assessment

When to use it

Before the start of a new activity or after an activity is completed

What you'll do

Using Mind maps, you can brainstorm ideas for an activity, a presentation or a project. You can also use a mind map to reflect on your learning and make your own self-evaluation on the topic.

What You Need

Mind map template

How to use it

Mind maps can be used both in planning and in the reflection learning phase.

In the planning learning phase:

1. *Write the topic in the middle circle / square*
2. *Research information about the topic using different resources*
3. *Write 5 terms in the circles / squares related to the main topic*

In the reflection phase:

1. *Write the topic in the middle circle / square*
2. *Reflect on the topic you worked on*
3. *Write 5 terms you learned about the topic in the circles / squares*
